Summary

I am a Professional Software Engineer with practical experience in building cross-platform mobile applications using Flutter, with strong command over GetX, Provider, and BLoC for effective state management. I also specialize in developing robust web applications using C#, ASP.NET Framework, and SQL Server. My expertise includes seamless integration of RESTful APIs, management of Firebase services, and working with both cloud-based and relational databases. I am dedicated to delivering clean, scalable, and high-quality solutions, and I thrive in collaborative, agile development environments. Always eager to learn and innovate, I strive to add value through both technical expertise and teamwork.

Skills

Languages & Technologies: HTML, CSS, JavaScript, Kotlin, Dart, C#
