Databases: MySQL, Microsoft SQL Server, Firebase Realtime, Cloud Firestore

Version Control & Tools: Git, GitHub, Postman, Visual Studio, VS Code, Android Studio,

Concepts: OOP, MVC and MVVM Architecture, RESTful APIs, App Localization, UI/UX principles, Agile Methodologies, CI/CD Pipelines, Push Notifications, In-App Purchases, Analytics Integration

PROFESSIONAL EXPERIENCE

Flutter Developer (Mid-Level)

Xtra App Studio • Multan Punjab

Sep 2025 – Mar 2026

- Developed and maintained Flutter applications for Android and iOS.
- Built production apps including SafeX, FuelLog, Fasting and Saving Goals App.
- Integrated Firebase services and applied GetX & Provider for state management
- Performed testing, debugging, UI/UX improvements, and performance optimization

Flutter Developer

Argon Teq Inc • Lahore Punjab

Jan 2024 – Apr 2025

- Delivered robust mobile solutions across Gaming, Logistics, Real Estate, and Utility sectors, adapting UI components to meet specific industry standards.
- Spearheaded the integration of complex REST APIs and third-party SDKs, ensuring secure and efficient communication between the frontend and backend.
- Contributed to code reviews, bug fixing, and testing

Flutter Developer (PartTime)

PutItCode • Multan Punjab

Sep 2021– Dec 2023

- Successfully delivered diverse mobile applications for international and local clients, ensuring all project milestones and technical requirements were met on schedule.
- Translated complex Figma and Adobe XD designs into pixel-perfect, responsive Flutter widgets, focusing on native-like performance and smooth user transitions.
- Fixed bugs, improved performance, and supported client requirements

Junior Flutter & Web Developer (Intern)

Social Club 24 • Multan Punjab

Oct 2020 –Aug 2021

- Assisted in Flutter mobile app development and ASP.NET Core web apps.
- Integrated Firebase Authentication & Firestore.
- Used GetX, Provider, and BLoC for state management.

PROJECTS

Bump – Pregnancy App & Tracker

- Designed and developed a comprehensive pregnancy tracking app providing week-by-week insights into fetal development and maternal health
- Delivered personalized guidance, reminders, and health tracking tools to support users throughout all pregnancy stages
- **Tech:** Flutter, GetX, Firebase, Push Notifications, In-App-Purchase
- **Platforms:** [Google Play](#), [App Store](#)

FuelLog (Car Maintenance App)

- Built a real-time fuel tracking system helping users reduce fuel costs by up to 20% through analytics and usage insights
- Enabled users to reduce fuel costs through usage insights and analytics
- **Tech:** Flutter, Firebase, GetX, Push Notifications, In-App-Purchase
- **Platforms:** [Google Store](#), [App Store](#)

HouseKeeper

- Built a service platform with real-time job updates, photo proof, and invoice generation
- Integrated REST APIs with Python backend for seamless operations
- **Tech:** Flutter, Provider, REST APIs, Python
- [Play Store](#)

Albarq Express – Courier App

- Developed a delivery management app with real-time tracking and notifications
- Improved workflow efficiency for merchants and delivery operations
- **Tech:** Flutter, REST APIs, Asp.net
- [App Store](#)

Qibla Finder Compass

- Built a Flutter-based app to determine precise Qibla direction using GPS, compass, and geolocation APIs
- Delivered a smooth and responsive user experience with high accuracy across devices
- **Tech:** Android, Location Services, Sensors API
- [Play Store](#)

True Muslim | Quran & Prayers

- Developed an Islamic app featuring Quran reading, prayer timings, and reminders
- Integrated location-based services for accurate prayer schedules
- Used by 100K+ users.
- Tech: Android, SQLite, Location Services
- [Play Store](#)

EDUCATION & ADDITIONAL INFORMATION

Bachelor's Degree in Computer Science

MNS-UET University • Multan, Punjab

- Open to relocation and remote roles
- Strong problem-solving and debugging skills
- Passionate about building scalable mobile applications
