Frameworks: Flutter, Asp.Net Core, Bootstrap, jQuery, .Net
Databases: MySQL, Microsoft SQL Server, Firebase Realtime, Cloud Firestore
Version Control & Tools: Git, GitHub, Postman, Visual Studio, VS Code, Android Studio,
Core Competencies: Mobile App Development, RESTful API Integration, CRUD Operations, State Management (GetX, Provider, BLoC), App Localization, Push Notifications, In-App Purchases (IAP), Firebase Integration, Analytics Integration, UI/UX Implementation, OOP, MVC & MVVM Architecture, Agile Development, CI/CD Pipelines, Testing, Debugging, and Optimization

PROFESSIONAL EXPERIENCE

Flutter Developer
Xtra App Studio • Multan Punjab **Sep 2024 – Aug 2026**

- Developed and maintained Flutter applications including SafeX, FuelLog, Fasting, and Savings Goals, delivering scalable cross-platform solutions.
- Implemented REST APIs, Firebase, CRUD operations, localization, push notifications, and third-party integrations.
- Integrated In-App Purchases (IAP) and optimized application performance, improving app responsiveness and user experience

Flutter Developer (Contract)
Argon Teq Inc • Lahore Punjab **May 2024 – July 2024**

- Developed and maintained HouseKeep, a Flutter-based mobile application, delivering responsive, user-friendly experiences aligned with business requirements.
- Integrated REST APIs, Firebase services, third-party SDKs, and real-time functionalities to ensure secure, reliable, and efficient data communication.
- Collaborated in feature development, code reviews, testing, debugging, and performance optimization to maintain application quality, stability, and scalability.

Flutter Developer
Freelancing • Multan Punjab **Jan 2021– Apr 2024**

- Delivered scalable Flutter applications across Gaming, Logistics, Real Estate, and Utility sectors, building responsive and user-friendly mobile experiences tailored to business requirements.
- Integrated REST APIs, Firebase services, third-party SDKs, payment solutions, and real-time features while ensuring secure and efficient data communication.
- Managed end-to-end development tasks, including requirement analysis, UI implementation, API integration, debugging, testing, and performance optimization.
- Collaborated with clients to understand business requirements, provide technical solutions, and deliver projects within agreed timelines.

PROJECTS

Bump – Pregnancy App & Tracker

- Designed and developed a comprehensive pregnancy tracking app providing week-by-week insights into fetal development and maternal health
- Delivered personalized guidance, reminders, and health tracking tools to support users throughout all pregnancy stages
- **Tech:** Flutter, GetX, Firebase, Push Notifications, In-App-Purchase
- **Platforms:** Google Play, App Store

FuelLog (Car Maintenance App)

- Built a real-time fuel tracking system helping users reduce fuel costs by up to 20% through analytics and usage insights
- Enabled users to reduce fuel costs through usage insights and analytics
- **Tech:** Flutter, Firebase, GetX, Push Notifications, In-App-Purchase
- **Platforms:** Google Play, App Store

HouseKeeper

- Built a service platform with real-time job updates, photo proof, and invoice generation
- Integrated REST APIs with Python backend for seamless operations
- **Tech:** Flutter, Provider, REST APIs, Python
- Google Play

Albarq Express – Courier App

- Developed a delivery management app with real-time tracking and notifications
- Improved workflow efficiency for merchants and delivery operations
- **Tech:** Flutter, REST APIs, Asp.net
- App Store

VIV-Intermittent Fasting Timer

- Log and monitor every fasting session with ease and stay focused with a reliable and intuitive timer
- Follow popular methods like 16:8, 18:6, or custom schedules
- Visualize your journey and stay motivated
- **Tech:** Flutter, Firebase, Provider, Push Notifications, In-App-Purchase
- Google Play, App Store Review

EDUCATION & ADDITIONAL INFORMATION

Bachelor's Degree in Computer Science
MNS-UET University • Multan, Punjab

- **Open to relocation and remote roles**
- Strong problem-solving and debugging skills
- Passionate about building scalable mobile applications
